AKAL COLLEGE OF ECONOMICS, COMMERCE & MANAGEMENT

ETERNAL UNIVERSITY, BARU SAHIB, DISTRICT SIRMOUR (H.P)

DECEMBER, 2020

ACKNOWLEDGMENT

The Akal College of Economics, Commerce and Management came into being in 2011, Eternal University, Baru Sahib and was later renamed as Akal College of Economics, Commerce and Management in 2014. At present, this college is pursuing its triple mandate of teaching, research and extension activities. The undergraduate and postgraduate students are being educated and trained in different specialized areas of economics, commerce and management. These students go to join various prestigious research and developmental organizations/institutions in the capacities of bank officers, technocrats, company managers and executives etc. with a pledge to serve the society. As on July 31st, 2019, there were thirteen faculty members (01 Professor cum Dean, 03 Associate Professors, 09 Assistant Professors 02 Lecturer and 1 Office Assistant) in this college to look after various concerned teaching, research, extension and other related activities. The research outcome of this college can be accessed from the number of completed and ongoing PG research theses as well as the various publications brought out in the form of research papers, books and book chapters.

The faculty of this college has also acquired the membership of different professional societies viz. Indian society of Agricultural Economics, Indian Society of Agricultural Marketing, and Agricultural Economics Research Association in the country.

At the outset, I take this opportunity to express my sincere gratitude to the Hon'ble Vice-Chancellor, Dr. H.S. Dhaliwal and Dr. Davinder Singh, registrar of the Eternal University for encouraging the faculty and interest taken in the overall development of this college. I am also thankful to Dr. B.S. Boparai Dean Academic Affairs, and Dr. B.S. Sohal, the COE cum Dean Post Graduate Studies for their valuable guidance and support in strengthening teaching, research and extension activities of this college. I am to place on record the support and co-operation of all faculty members in discharging my duties sincerely and more effectively. I also put on record the efforts of annual report committee members Dr. Geeta Kumari and Ms. Kuldeep Kaur.

Thesis Title : A Study on Market Segmentation of Hair Care Fast-Moving Consumer Goods in Chandigarh.

Market segmentation is a process in which the market of potential customers is broken down into different groups and segments based on specific characteristics. It is assumed that different segments require different marketing programs because different customers are usually addressed by different offers, prices, promotions, distributions or a combination of marketing variables. The care of the scalp is important because it determines the health and condition of the hair and also prevents the diseases of the scalp and hair. The present study sought to identify some factors that could affect scalp health such as the environment, nutrition and individual factors that determine the health of hair through the use of hair care products. The study aims to analyse the effects of market segmentation on the buying behaviour of customers and it also identified the impact of different targeting strategies of FMCG on

four company's products namely- Procter and Gamble, Unilever, L'Oréal, Patanjali. The FMCG industry mainly covers the production, distribution and marketing of consumer goods. Consumer goods are moving quickly and consumed by consumers for their use and bought repeatedly. Consumers procure these products regularly in small quantities. The consumption of such products is very high due to the need of the consumer for fast-moving consumer goods. FMCGs usually refer to non-durable products that are consumed in a short time and are consumed frequently daily. A sample of 60 customers (20 respondents from top-level sectorial markets, 20 respondents from medium level sectorial markets, 20 respondents from low-level sectorial markets). Percentage analysis, Correlation and Regression was applied to analyse the data. The result showed that the study on market segmentation of hair care fast-moving consumer goods.

 Thesis Title : A Study on Performance Appraisal System in Avani Textiles Ltd. Sangrur, Punjab

Performance appraisal system is the systematic evaluation of the performance of employees and to understand the abilities of a person for further growth and development. The research study is based upon the Performance Appraisal System in Avani Textiles Ltd. Sangrur, Punjab. In this study, the operative function in the human resource department is analyzed with respect to the Performance Appraisal System of the organization. The present study was conducted with the aim to examine the awareness level, satisfaction level, and impact of Performance Appraisal System on employees' performance. Sample sizes of respondents were 60 and data was collected through questionnaire. The data were analyzed through percentage, mean, standard deviation, and regression model. From the analysis it is found that mostly the respondents were felt that the Performance Appraisal System is done by the organization is satisfactory. It was also revealed that the employees are satisfied with existing performance appraisal system, and from the results of regression model it is concluded that there is almost 91.2 % variation in the dependent variable that is (increase productivity). The study suggested that women's contribution should be increased in all sectors, which results in the overall empowerment of women's. Awareness of employees should be enhanced while assessing the performance appraisal task.

 Thesis Title : A Comparative Study on Occupational Health and Safety of Workers in Selected Pharmaceutical Companies in Solan Town, Himachal Pradesh (With special reference to Alchemist Ltd. and Corona Remedies Pvt. Ltd)

Employees are the most important assets for an organization as they contribute the most towards the success of an organization. The success of an organization depends on the essential skills of its human capital. However, this human capital so far requires attention to be paid to the health and safety of workers in the workplace. But it is sad to say that the working conditions of employees face many problems. In order to provide employees with a safe and healthy work environment, an effective and appropriate system of safety and health is of paramount importance. At work, workers face an array of hazards almost as numerous as different types of work, including chemicals, biological agents and adverse ergonomic conditions, and so on. The present study is conducted with the objective to

highlight the occupational health and safety measures for the employees and the satisfaction level of the employees with the occupational health and safety facilities provided by selected pharmaceutical companies. In addition to that; it also highlighted the awareness and training program undertaken by the companies. A sample of 30 employees from each of the selected pharmaceutical company has been selected. The analysis of the present study has been done through appropriate statistical and mathematical tools including percentage analysis, mean, standard deviation, correlation and regression analysis depending upon the objectives of the study. The results showed that the employees of both the companies are fairly satisfied with the ongoing training programme on risk of health and safety of workers. As far as the occupational health and safety facilities are concerned, the selected pharmaceutical companies provide many facilities to their workers. Also, the satisfaction level of the workers with these measures is high which is a good symbol of a harmonious relation between management and the employees.

Thesis Title : Effect of Training and Development on Employees
Performance in Banking Sector: A Special Reference to
District Kangra

Training and development is the foundation to help bank employees to develop their individual and organizational skills and knowledge. The focus of all human resource development features is on developing the larger workforce so that the organization and individual employees can achieve their work goals. Employee is a bloodstream of every business. The performance of the company depends on the performance of its employees. As a result, top management recognized the importance of investing in education and training to improve employee performance. For the present study, a simple random sampling method with a sample size of 100 employees (50 respondents from SBI and 50 respondents from ICICI) was used; the primary data for the study was collected using a questionnaire structured with 5 points of the Likert scale. The data from the questionnaire was analyzed with the tools such as Percent method, ranking and t-test with SPSS version 23.0. This research identifies the impact of training and development on the performance of bank employees.

Thesis Title : A Study of Employee's Turnover in Meridian Medicare
Limited, Solan, Himachal Pradesh

For any organization, employees are very important assets because the success of organization depends upon their employee's performance and satisfaction. For this, we can count these things in employee turnover. Employee turnover means the number or percentage of workers who leave an organization and are replaced by new employees. A huge concern of most of the companies, employee turnover is a costly procedure especially in lower paying job roles due to the employee turnover rate is higher. Many factors play a vital role in the employee turnover rate of companies and these can stem from both the employer and the employees. Wages, employee attendance, job performance and other benefits of companies are all factors that play a significant role in employee turnover. This present study highlighted the employer and employee related factors that are affecting employees' turnover. In addition to that it also highlighted the external factors affecting employees' turnover. A random sample of 60 employees of Meridian Medicare Ltd were chosen from each

department i.e. production, human resource, finance and sales. The analysis of the present study has been done through appropriate, statistical and mathematical tool including Percentage Analysis, Factor Analysis and Regression Analysis is used. The results showed that the employer and employee related factors have a significant impact on employees' turnover. From the result it is clear that there is very less variation in the dependent variable i.e. employee turnover with real opportunities, pay factor, geographic location, commuting time or distance undertaken by the company related to employee's turnover. Employee turnover can be reduced only by quality of work life. Employee's satisfaction differs from person-to-person. Some of them need monetary benefits, some others need only appreciation & prestige, skilled labour expectations toward safety & security. Middle – class family employee requirements are welfare, security & compensation. From this study, it was concluded that the employees of Meridian Medicare Limited were fairly satisfied with their job and there was very less employee turnover in the company.

 Thesis Title : **The effect of Credit Assessment Process in the Advancement and Repayment of Bank Loans and NPAs: A study of Jammu and Kashmir Bank, Jammu**

The economic system is defined as a social field that emphasizes the practices, discourses and material formulations that are connected with the production, utilization, and management of resources. A strong banking sector is important for a booming economy. But in today's scenario, Indian banking sector are facing many challenges, the top most challenge is Non-Performing Assets (NPAs) or bad loans. It affects the smooth flow of credit and credit creation. NPAs is very much serious issue for our banking sector because the asset quality of banks can be assessed by monitoring the NPAs, Indian economy as well as their growth. The main reason behind NPAs is credit creation process which assist to credit risk. Thus, a banker who lends money should follow a very cautious policy. During the lending process, the banker should properly evaluate the project or not repays loans and forward motions. Credit analysis is the method of calculating the creditworthiness of a company or organization. The target of the credit analysis is to analyze both the borrower and the proposed credit facility and to conduct a risk assessment. A sample of 60 loanee and 18 bank employees was collected. Data was collected with the help of self-structured questionnaire. Percentage analysis, forecasting technique and calculation of CAGR (Compound Annual Growth Rate) were applied to analyse the data. Result showed that credit appraisal process has an impact on NPA's and on bank's performance.

 Thesis Title : Production and Marketing of Major Cash Crops in Adopted Villages of Eternal University, District Sirmour, Himachal Pradesh

The study was carried out to examine the production and marketing of major cash crops raised by different category of farmers in five adopted villages of Eternal University, Baru Sahib. The study also worked out the costs, margins& price-spread and identified the marketing problems faced by farmers and middlemen. A random sample of 60 farmers was chosen for the study. The major findings revealed that production of vegetables varied from 4.42 q for capsicum to as high as 18.93 q of tomato per farm. Garlic being a spice crop gave highest production of 22.37 q per farm. Resultantly, the marketable surplus of garlic was highest of 99.12 per cent of total production. As much as 0.40 per cent of total production meant for home consumption. Production losses were less than 1 per cent on all categories which shows that farmers were able to keep the losses to lowest level. The marketable surplus of other cash crops was observed 97.99, 97.29, 96.15, and 95.07 per cent for tomato, capsicum, beans and peas, respectively. The cash crops of the study area were found to be disposed of through two major channels {Channel I i.e.; Producer → Local Trader →Wholesaler/CA (outside the state)→ Retailer → Consumer and Channel II i.e.; Producer → Local Trader →Wholesaler/CA (within the state)→ Retailer → Consumer}. Garlic was exported to Tamilnadu, Kerala, Gujarat and Delhi markets, whereas tomato, capsicum, beans and peas were found to sell in Delhi, Karnal, Ambala, Chandigarh and Ludhiana markets. Within states, Shimla, Solan and Rajgarh were the major markets availed of for the sale of selected vegetables. The high cost of material inputs associated with incidence of pest and diseases were the major problems reported by farmers. The study suggestedthat quality material inputs such as seed, fertilizers and pesticides from truthful agencies along with extension services need to be made available to the farmers at reasonable cost. If agro processing unit for cash crops is established near the study villages, it may not only be helpful to enhance the producer’s share in consumer’s rupee, rather it may create additional employment avenues in the study area.

17 Teacher's Day Celebration

Teacher's Day was celebrated on 5th September, 2019 and the celebration began at 9:30 am in the seminar hall of the college on the occasion of the birth anniversary of India's second President, Dr. Sarvepalli Radhakrishnan. Dr. Sarvepalli Radhakrishnan was of the opinion that "teachers should be

the best minds in the country”. On every September 5, Teacher’s Day is celebrated all over India as an occasion to appreciate and acknowledge the efforts and hard work of our teachers in making us sophisticated and responsible individuals. The motivational speech given by Dean Dr. S. K. Chauhan, Akal College of Economics Commerce and Management was mainly focussed on importance of student teacher relationship and positive learning environment for the students. Then students performed special cultural program for their teachers to make them happy and feel special in every way possible which include felicitation of teachers and various interactive games too. Program was concluded by vote of thanks by the students of MBA 3rd Semester. This program was coordinated by Ms. Jyoti and Reetu.
